

Unable to change currency, market or language.

The issue is likely due to the fact that your PC had a multi-vendor version of Frame Designer installed before. Resolve by:

1. In Windows Run dialog, type **regedit.exe**

2. In registry editor, navigate to key: **HKEY_CURRENT_USER\Software\Framexpert\Cad**. Right-click on “**Cad**” key and select **Delete** menu.

3. Reinstall the software from this location:

http://framexpert.com/media/download/windows/maytec/maytec_designer.exe
